Ethan Kremer | ethk21578@gmail.com | (602) 644 - 0194 | Portfolio | LinkedIn | GitHub

EDUCATION

Arizona State University - Ira A. Fulton Schools of Engineering: *Tempe AZ* **8/23 - 5/27**

- Computer Science BS (Software Engineering) Major/Music Minor: Graduating May 2027
- 4.0 GPA | Ira A. Fulton Dean's List from Fall 2023 - Present

EXPERIENCE

Software Engineering Intern - Enterprise Technology: *Ford Motor Company, Dearborn MI* **5/26 - 8/26**

- Developed an internal application from the ground up to audit GitHub repositories against Ford-defined best practices
- Designed, built, and deployed five Google Vertex AI agents for integration into an internal agentic workflow:
  GitHub Scraper → File Collection/Organization → Agent Delegation → GitHub Issues Formatting
- Built an Angular front-end enabling teams to audit their repositories and view metrics through our system
- Participated in Agile practices including sprint planning and standups on a team in the Dev-Enablement department
- Delivered a scalable application expected to audit over 50,000 repositories and remain as a maintained internal tool

Community Assistant - Tooker House: *Arizona State University, Tempe AZ* **7/24 - Present**

- Engaged with over 4,000 incoming engineering students across three years to foster an inclusive and safe community
- Collaborated with ASU housing partners to organize educational, community-driven events for residents
- Maintained a safe residential environment by addressing policy violations and conducting regular student check-ins

Undergraduate Teaching Assistant - CSE 355 (Theoretical CS): *Arizona State University, Tempe AZ* **8/26 - Present**

- Supported over 300 undergraduate students through office hours, review sessions, and exam proctoring
- Tutored students on finite automata, Turing machines, and related theory of computer science concepts

Line & Fry Cook / Store Trainer: *In-N-Out Burger, Chandler AZ* **6/21 - 8/25**

- Partnered with assistant managers to plan and implement effective training strategies for new associates

PROJECTS

ProXimite - Aerospace Supply Chain Intelligence Platform (Senior Capstone): *Surgestreams, Remote* **8/26 - Present**

- Collaborating with a student team and industry founder to ship production features for a live platform connecting U.S. aerospace buyers with verified domestic suppliers
- Developing on a full-stack production codebase using FastAPI (Python), React/TypeScript, PostgreSQL with pgvector, and Docker, alongside a multi-agent AI layer built with CrewAI
- Contributing to a platform built for a regulated industry, where ITAR/EAR export control and compliance requirements shape architecture and data handling

Portfolio Website (ethan-kremer-projects.com) **10/25 - Present**

- Developed a responsive personal portfolio website using React, Vite, and Tailwind CSS featuring projects, education, music, and professional information
- Designed the site's interface in Figma before implementing it as reusable and scalable React components

Video Game Development **7/24 - Present**

- Developing gameplay systems and state machines using object-oriented programming principles
- Managing Git version control, feature branches, and release builds for ongoing game development
- Games: **Nine Leaps** (Co-Developer, Unity) | **Merely Dreaming** (Solo Developer, GameMaker)

TECHNICAL SKILLS

Languages & Frameworks	—	Python, Java, JavaScript, C++, C#, SQL | React, Angular, HTML, CSS, Spring Boot
Developer Tools	—	Git, GitHub, Gemini Enterprise, FastAPI, PostgreSQL, Docker, CI/CD, Jira
Design	—	Figma, Unity, Gamemaker, Miro, Photoshop, Canva, Powerpoint
Other	—	Object-Oriented Programming, Data Structures & Algorithms, Agile Development
